**THE UNIVERSITY OF AUCKLAND'S NEWMARKET CAMPUS
DEVELOPMENT**

In 2013 the University of Auckland acquired the 5.2ha former Lion Breweries site to create a new campus towards creating an integrated cluster with the existing City and Grafton campuses. Over the next thirty years the site will be redeveloped into a mixed-use campus, with purpose built teaching and research space, student accommodation, business development and other facilities. This presentation will explore the rationale for the purchase, the due diligence process, the current building programme and relevant development principles.
